

## About

Nationalities: Switzerland, South Africa  
Date of birth: 23. September 1986  
Languages: English (native), German (B2)

E-Mail: [oliver.m.angelil@gmail.com](mailto:oliver.m.angelil@gmail.com)  
Website: <https://oliverangelil.github.io/>  
LinkedIn: <https://www.linkedin.com/in/oliver-angelil/>  
Github: <https://github.com/oliverangelil>

## Profile

Data-driven scientist with 10+ years of practical experience in programming and statistics. Strong technical background in Python (scikit-learn, pandas) to gain insights into large volumes of multi-dimensional data through the application of a range of statistical inference and machine learning methods. Experience in a business environment managing stakeholder expectations and delivering timely results.

## Work Experience

2021	<b>Data Science Volunteer at Ishango (2-months unpaid leave from Credit Suisse)</b> Volunteered at a Data Science school in East Africa, supervising 14 students working on real world data science projects in collaboration with 7 different global companies.	Kigali
2018 - now	<b>Senior Data Scientist at Credit Suisse</b> Used Pyspark and Palantir software to develop pipelines and models to surface populations of clients that pose risk to the bank. Insights from analyses were presented to stakeholders across the bank, with the ultimate goal of reducing regulatory risk. After two years started managing and mentoring a small team of Data Scientists.	Zurich
2015 - 2018	<b>PhD in Climate Science at UNSW</b> Statistical learning methods were used to improve the prediction skill of means and extremes by weighting climate models in order to best explain a response variable of interest. The weighted subsets were then used to attribute the probabilities of extreme weather events to anthropogenic greenhouse gas emissions. Results were presented at a number of international conferences.	Sydney
2014 - 2015	<b>Research Scientist at LBNL</b> Used Extreme Value Theory to better resolve the statistics (e.g. exceedance probabilities, return periods) of extreme weather events. Published work in Journal of Climate.	Berkeley

## Technical Skills

Data Science:	Machine Learning; Deep Learning; Data Visualization; NLP
Data Engineering:	PySpark; git; bash; unix; SQL; automation; unit testing; regression testing
Languages:	Python (advanced); MATLAB (intermediate); R (intermediate); bash (intermediate)
Libraries:	pandas; spacy; gensim; HuggingFace; scikit-learn; tensor-flow
Cloud:	AWS (Sagemaker, S3, EC2)
Documentation:	MS Office Suite; Latex; Jupyter Book; Markdown

Servers and Automation:     Home-built server running FreeBSD for data backups and website hosting

## Education

2015 -	<b>Ph.D at UNSW.</b> candidate (Climate Change Research Centre)	Sydney
2018	Thesis: <i>Uncertainty around probabilistic event attribution statements for extreme weather events.</i> <b>Coursera:</b> Machine Learning by Andrew Ng <b>Stanford:</b> Statistical Learning by T. Hastie and R. Tibshirani	Online Online
2013 -	<b>M.Sc. at ETHZ</b> in Atmospheric and Climate Science	Zurich
2015	Thesis: <i>Spatial and temporal influences on human attribution to extreme weather risk: a global study</i> Grade: 5.15 out of 6	
2010	<b>Honors at UCT</b> in Atmospheric Science Grade: 74/100	Cape Town

## Awards

2015 -	<b>Australian Research Training Programme Scholarship</b>	Sydney
2018	Covers the full cost of tuition fees during the Ph.D. programme (AUD \$117,360) and provides a living allowance valued at AUD \$77,547 in total. Awarded to 30 students / year.	
2015 -	<b>CCRC scholarship</b>	Sydney
2018	AUD \$15,000 in total from the Climate Change Research Centre, UNSW	

## Publications

I have (co)authored 24 papers in distinguished scientific journals. Find the full list here:

<https://oliverangelil.github.io/publications/>

## Referees

### Daithi Stone

Research Scientist at NIWA Supervisor during my M.Sc. and Ph.D. degrees at ETH, Zurich & UNSW, Sydney respectively.

[dastone@runbox.com](mailto:dastone@runbox.com)

### Markus Donat

Research Scientist at BSC Supervisor during my Ph.D. degree at UNSW, Sydney

[markus.donat@bsc.es](mailto:markus.donat@bsc.es)

### Thomas Lanz

Data Science team lead and line manager at Credit Suisse, Zurich

[thomas.lanz@credit-suisse.com](mailto:thomas.lanz@credit-suisse.com)
